SYNAPSE STOCKS: AI-POWERED STOCK INTELLIGENCE PLATFORM

Welcome to SynapseStocks

A full-stack, agentic AI platform built to help investors and analysts decode the stock market with clarity and confidence.

Whether you're tracking financial trends, climate impact, or social sentiment, SynapseStocks empowers you with explainable, multi-factor insights through:

- Modular AI agents tailored to different sectors
- A sleek, responsive dashboard built with React and Material-UI
- Secure JWT-based authentication
- A clean monorepo structure for easy development and deployment

This project is ideal for developers, data scientists, and financial analysts looking to explore intelligent market analysis tools in a demo or educational setting.

SYNAPSE STOCKS: AI-POWERED STOCK INTELLIGENCE PLATFORM

Resources and Links

Ready to dive into SynapseStocks? Whether you're setting it up for the first time or thinking about contributing, here's everything you need to hit the ground running.

Where to Find the Project

- **GitHub Repository**

The heart of the project lives here:

[SynapseStocks on GitHub](#)

How to Get Started

- **Quick Start Guide**

The main README.md walks you through setting up both the backend and frontend—perfect for getting things up and running fast.

- **Frontend Setup**

Want to customize the dashboard or tweak the UI? Head to client/README.md for all the details.

- **Backend Setup**

Curious about how the agents work or how data flows? server/README.md has you covered.

Learn More About the Tech Behind It

If you're new to any of the tools used in SynapseStocks, these links will help you get familiar:

- [React](#) – The framework powering the dashboard
- [Material-UI](#) – For clean, modern UI components
- [Node.js](#) – The engine behind the backend
- [Express](#) – Handles routing and APIs
- [lowdb](#) – A simple JSON-based database
- [JWT](#) – For secure user authentication
